

Ryan Andersen

WEB DEVELOPER

Expertise

Full Stack Software Engineer skilled in website and application development, testing and optimization. Excels at creating engaging designs, creative solutions, and coordinating ground-up planning.

Employment History

Web Developer — SEO Design Chicago,
Chicago, IL (Remote)

OCT 2023 - PRESENT

- Developed full stack personalized WordPress websites using a variety of themes, page builders, and plugins.
- Integrated custom CSS, UX blocks, fonts, icons, forms, and a variety of other tailored assets into existing website structure while establishing a cohesive style based on client preferences and needs.
- Solved problems in a procedural manner while maintaining a high standard for the user experience and user interface (UX/UI).

Software Developer — Ryan Design Co,
Salt Lake City, UT (Remote)

DECEMBER 2021 - PRESENT

- Designed, produced and deployed numerous websites and applications for clients, resulting in customer referrals and followups for new potential clients.
- Created and maintained more than 25 projects for personal use and/or portfolio pieces, each requiring ground-up planning, self-motivation, and time management.
- Developed a modern dating app using React, with swiping functionality and image fetching for user profiles. Fashioned a unique random activity generator in the chat section to provide users with fresh date ideas.
[view project](#)
- Constructed a word-fetching query engine that extracted data from an API, improving data accessibility and usability while significantly upgrading the visual aesthetic.
[view project](#)
- Built a user-friendly weather app using HTML, CSS, and JavaScript that fetches data from an API. Implemented geolocation to display accurate weather data based on the user's location, and added dynamic styling depending on different weather conditions.
[view project](#)
- Generated and styled this resume using HTML & CSS.
