Ryan Andersen

Front-End Developer | Web Developer | UI/UX
Trinidad, CO | (801) 898-9648 | ryanandersen.design@gmail.com | ryandesign.co

SUMMARY

Front-end developer with nearly 4 years of experience building responsive, accessible websites and web applications with JavaScript, React, Content Management Systems (including WordPress), and modern CSS frameworks. As primary web administrator for Trinidad State College, redesigned 200+ pages in Modern Campus CMS (Omni CMS), built a reusable component library, and cut critical accessibility issues by 73% across a 954-page site. Combines WCAG 2.1 AA expertise and design-system thinking with a visual design and media background.

TECHNICAL SKILLS

Front-End: JavaScript (ES6+), TypeScript, React, Next.js, HTML5, CSS3, SASS/SCSS, jQuery
Frameworks & Libraries: Tailwind CSS, Bootstrap, Material UI, Shadcn UI, Express.js
CMS & Back-End: WordPress (Gutenberg, Elementor, Divi, Flatsome), Modern Campus CMS (Omni CMS / OU Campus), PHP, SQL/MySQL
Design & Accessibility: WCAG 2.1 AA, Accessibility Auditing, Figma, Adobe Creative Suite, Design Systems, Wireframing
Tools & Workflow: Git, GitHub, Node.js, API Integration, Jira, Microsoft Teams, Responsive Design, Cross-Browser Testing
Analytics & SEO: Google Analytics 4, Google Tag Manager, SEO, AEO/GEO (AI & Generative Engine Optimization), Web Performance, Content Strategy
AI-Assisted Development: Claude, ChatGPT, GitHub Copilot, Google AI — code scaffolding, troubleshooting, rapid prototyping

EXPERIENCE

Webmaster | Trinidad State College, Marketing Department · Trinidad, CO Jan 2026 – Present

- Lead development, UX/UI, accessibility, analytics, SEO, and content as the primary web administrator on a two-person marketing team.
- Redesigned the public websites for the Trinidad and Alamosa campuses, rebuilding 200+ pages with responsive layouts, improved navigation and information architecture, and reusable templates.
- Built a custom, accessible, mobile-responsive component library from scratch in Modern Campus CMS (Omni CMS), letting staff publish polished pages without developer involvement.
- Reduced critical accessibility issues by 73%, serious by 47%, and moderate by 61% across a 954-page site, tracked with the Modern Campus Insights tool, through page-level fixes and sitewide template improvements aligned with WCAG 2.1 AA.
- Strengthened security and publishing controls: upgraded jQuery from 3.3.1 to 3.7.1, restored the CMS accessibility checker, and implemented publish gating so critical accessibility issues cannot reach production.
- Independently audited the inherited codebase and CMS with no knowledge transfer, resolving security, SEO, and technical-debt issues, including broken links, obsolete pages, and development URLs appearing in search.
- Established Google Analytics 4 and Google Tag Manager from scratch, replacing an orphaned account with institutionally owned analytics and more reliable tracking.
- Overhauled site search relevance, removed 50+ broken pages, and applied SEO/AEO best practices to improve visibility and user experience.
- Own production of *Trinidad State Stories*, the college's official podcast, including audio/video editing and technical setup.
- Work in a marketing department that reports directly to the college president, who cited the website as a compelling factor in his decision to apply.

Front-End Developer | Ryan Design Co. · Remote Dec 2022 – Dec 2025

- Developed and deployed 15+ custom websites and web apps using WordPress (Gutenberg, Elementor, Divi, Flatsome) and other CMS platforms, React, JavaScript, and modern CSS frameworks.
- Translated designer-provided Photoshop/Illustrator files into fully built, responsive CMS sites, customizing child themes to match.
- Built responsive design systems and component libraries for consistent, scalable experiences across devices.
- Achieved 90+ Google PageSpeed scores through code optimization and asset management.
- Integrated third-party APIs and translated client requirements into technical specs and user-friendly interfaces.
- Used AI tools (Claude, ChatGPT, GitHub Copilot) for code scaffolding, troubleshooting, and faster iteration across client projects.

Web Developer | SEO Design Chicago · Remote Oct 2023 – Nov 2024

- Built 19+ custom WordPress sites with integrated forms, responsive typography, and mobile-first design.
- Implemented advanced UI interactions, animations, and responsive behavior with custom CSS and JavaScript.
- Applied accessibility and cross-browser best practices on tight-deadline client projects with design and content teams.

Captioning Agent | CaptionCall · St. George, UT Apr 2019 – Dec 2020

- Provided real-time phone captions for deaf and hard-of-hearing users, maintaining 98%+ accuracy.
